

Deliverable 1

Questions to answer

1. Which project will you be completing?
 - The project I will be completing is creating a Minecraft server.
2. Why have you chosen this project? I play Minecraft all the time and figured this would be an interesting project.
3. What are the possible problems, roadblocks, or difficulties you anticipate during the process of completing the project? Well considering I do not have any Linux experience, I am somewhat intimidated with anything related to Linux.
4. How are you planning to overcome these difficulties? But I am confident I can overcome any possible obstacles by searching the web.
5. How do you think completing this project will help you in your career? I think Linux in general is a great tool. Being able to configure servers and clients via the terminal would make great practice for possible scenarios where I would need to deploy a Linux VM.
